

AI-Driven Development - 30-Day Challenge

Task-3

Participant Information

- **Name:** Khurram Shahzad
 - **Class:** Friday slot (6–9 pm)
 - **Roll #:** 00116199
 - **Class Teacher:** Syed Hamzah
-

PART A — Research Questions (Short Answers)

1. What new improvements were introduced in Gemini 3.0?

Gemini 3.0 introduces state-of-the-art reasoning, stronger multimodal capabilities (text, images, video, audio), and agentic features for automation. It is Google's most intelligent model to date, designed to handle complex tasks across enterprise and developer environments

2. How does Gemini 3.0 improve coding & automation workflows?

Gemini 3.0 adds agentic coding and automation features, enabling AI agents to plan, write, test, and manage code across full-stack environments. Tools like *Antigravity* allow developers to automate multi-step workflows, while Gemini Agents can execute tasks rather than just suggest code

3. How does Gemini 3.0 improve multimodal understanding?

Gemini 3.0 excels at multimodal integration, combining text, images, video, and audio with advanced reasoning. This allows it to analyze and synthesize information across formats, making it more effective for tasks like search, creative assistance, and enterprise automation

4. Name any two developer tools introduced with Gemini 3.0.

Two key developer tools introduced are:

- **Antigravity** — a new development environment where AI agents can manage code across editor, terminal, and browser.
- **Google AI Studio** — a unified playground to experiment with Gemini models across text, image, audio, and video

PART B — Practical Task (Screenshot Required)

Task:

You must complete the following steps:

Update the Gemini 3.0 model

Using the `/model` command in Gemini CLI, update the Gemini model to the latest version (3.0).

Note: You do not need to update the CLI itself; only the model should be updated.

Gemini CLI updates Screenshots.

```
npm install @google/gemini-cli@0.17.0

GEMINI

Gemini 3 is now available.
Join the waitlist at https://goo.gle/enable-preview-features

Tips for getting started:
1. Ask questions, edit files, or run commands.
2. Be specific for the best results.
3. Create GEMINI.md files to customize your interactions with Gemini.
4. /help for more information.

Gemini CLI update available! 0.16.0 → 0.17.0
Installed with npm. Attempting to automatically update now...

You are running Gemini CLI in your home directory. It is recommended to run in a project-specific directory.

> █ Type your message or @path/to/file

~                               no sandbox (see /docs)                               auto
```

```
Gemini - kenneth

You are running Gemini CLI in your home directory. It is recommended to run in a project-specific directory.

  • User Settings
  • Workspace Settings
  • System Settings

(Use Enter to select, Tab to change focus, Esc to close)
```

GEMINI 3.0 is now ENABLED

Gemini - kenneth

```
> /model  
  
> /model list  
  
> /model set 3  
  
> /model current
```

You are running Gemini CLI in your home directory. It is recommended to run in a project-specific directory.

Select Model

Gemini 3 is now enabled.
To disable Gemini 3, disable "Preview features" in /settings.
Learn more at <https://goo.gle/enable-preview-features>

When you select Auto or Pro, Gemini CLI will attempt to use gemini-3-pro-preview first, before falling back to gemini-2.5-pro.

1. Auto
Let the system choose the best model for your task.
- 2. Pro (gemini-3-pro-preview, gemini-2.5-pro)
For complex tasks that require deep reasoning and creativity
3. Flash (gemini-2.5-flash)
For tasks that need a balance of speed and reasoning
4. Flash-Lite (gemini-2.5-flash-lite)
For simple tasks that need to be done quickly

To use a specific Gemini model on startup, use the --model flag.
